RE: ALUC consistency determination for a referral from the City of San Jose for the Downtown West General Plan Amendment and Rezoning (City of San Jose file numbers GP19-009, PDC19-039), affecting lands within the San Jose International Airport Influence Area (AIA).

Dear Mr. Han:

The ALUC considered the above referral for consistency with the policies of safety, height and noise contained within the San Jose International Airport Comprehensive Land Use Plan (SJC CLUP), at their December 16, 2020 Meeting.

The proposed General Plan Amendment and Rezoning would allow development in conflict with Table 4-1 and Noise policy N-4 of the SJC CLUP.

Table 4-1 of SJC CLUP states: “residential uses are “Generally Unacceptable” between the 65-70 dBA CNEL Noise Contours. New construction or development should be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design. Outdoor activities are likely to be adversely affected.”

Policy N-4 of the SJC CLUP states: “No residential or transient lodging construction shall be permitted within the 65 dB CNEL contour boundary unless it can be demonstrated that the resulting interior sound levels will be less than 45 dB CNEL and there are no outdoor patios or outdoor activity areas associated with the residential portion of a mixed-use residential project or a multi-unit residential project. (Sound wall noise mitigation measures are not effective in reducing noise generated by aircraft flying overhead.) “

The proposed General Plan Amendment and Rezoning would also allow building heights in conflict with FAA Part 77 Surfaces by using TERP surfaces to define future building heights. The ALUC uses FAA Part 77 Surfaces as a height restriction boundary.

The ALUC found the referral **Inconsistent** with the noise and height policies as defined in the San Jose International Airport Comprehensive Land Use Plan (SJC CLUP).
